

Strapping

Core

Western Container has upgraded their offerings to include precise strapping cores cut in-line with their new Multi-knife Winder/Cutter. Precise lengths are controlled by having multiple knife holders where material is cut in-line between these servo driven knife holders. Accuracy is paramount on this new machine with in-line cutting tolerances of .020, for the most stringent of applications.

- Current cutting mandrels include 3", 6", 7.91, 8" & 9.71,
- Most cost efficient in-line cutting within the industry
- Quick turnaround on all orders with most being completed within 2-5 days
- Eliminates the re-cutting process which decreases production time and overall cost

Visit our new site to inquire about how Western Container can serve you and your strapping core needs. Western Container is a full line custom paper core manufacturer with the capabilities to produce almost any core within the industry, cost effectively and quickly.

We're proud to say, "We're wound up to serve you!"
