

Ship it safe, wrap it right, with our super-strength Tape & Label Cores, Protective Packaging and Composite Cans!

*Western Container continues the expansion of its manufacturing operations in Beloit Wisconsin. The construction of the 8,000 sq. ft. warehouse addition, started in November 2013, and includes two new receiving docks.*

*The warehouse provides additional raw material storage to directly supply our five spiral winding lines and six off-line cutters. Our new CM-14 large ID cutter will primarily run 16", 20" & 24" inside diameters.*

*The new cutting capacity increases Western Container's ability to meet the customer's growing demand for manufacturing steel banding & strapping cores. Completion of the storage addition is scheduled for June 2014.*

*We are Growing!*

**Watch for our new website launching this summer!**
