

Ship it safe, wrap it right, with our super-strength Tape & Label Cores, Protective Packaging and Composite Cans!

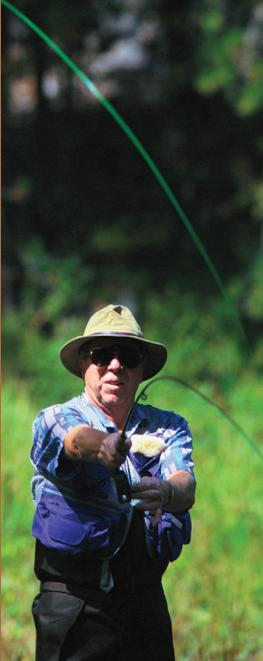

TESTIMONIAL

“our shipping tubes are complicated with a basic heavy walled inner tube with a steel end, two outer tubes finished in a high quality black paper with an interior steel cap on both ends. Everything must fit together perfectly to have it work smoothly and maintain our company image. The bid we received was less than half the price of our other supplier.”

Western Container was great to work with on our projects and took a personal interest in dealing with me, something that is often hard to find today.”
